

Programmable Logic

PAL, PLA

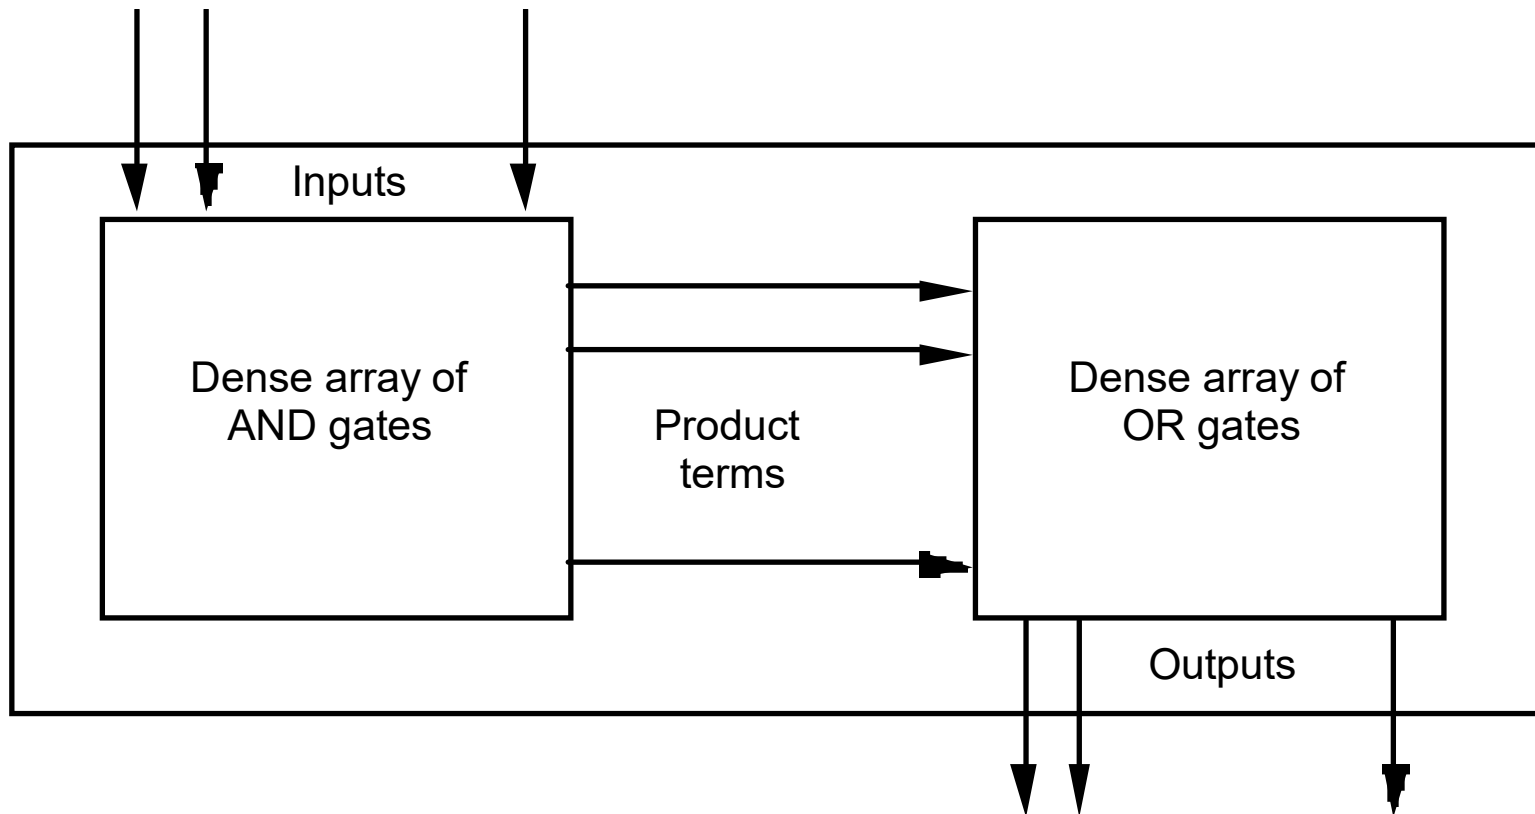

PLAs

Programmable Logic Array

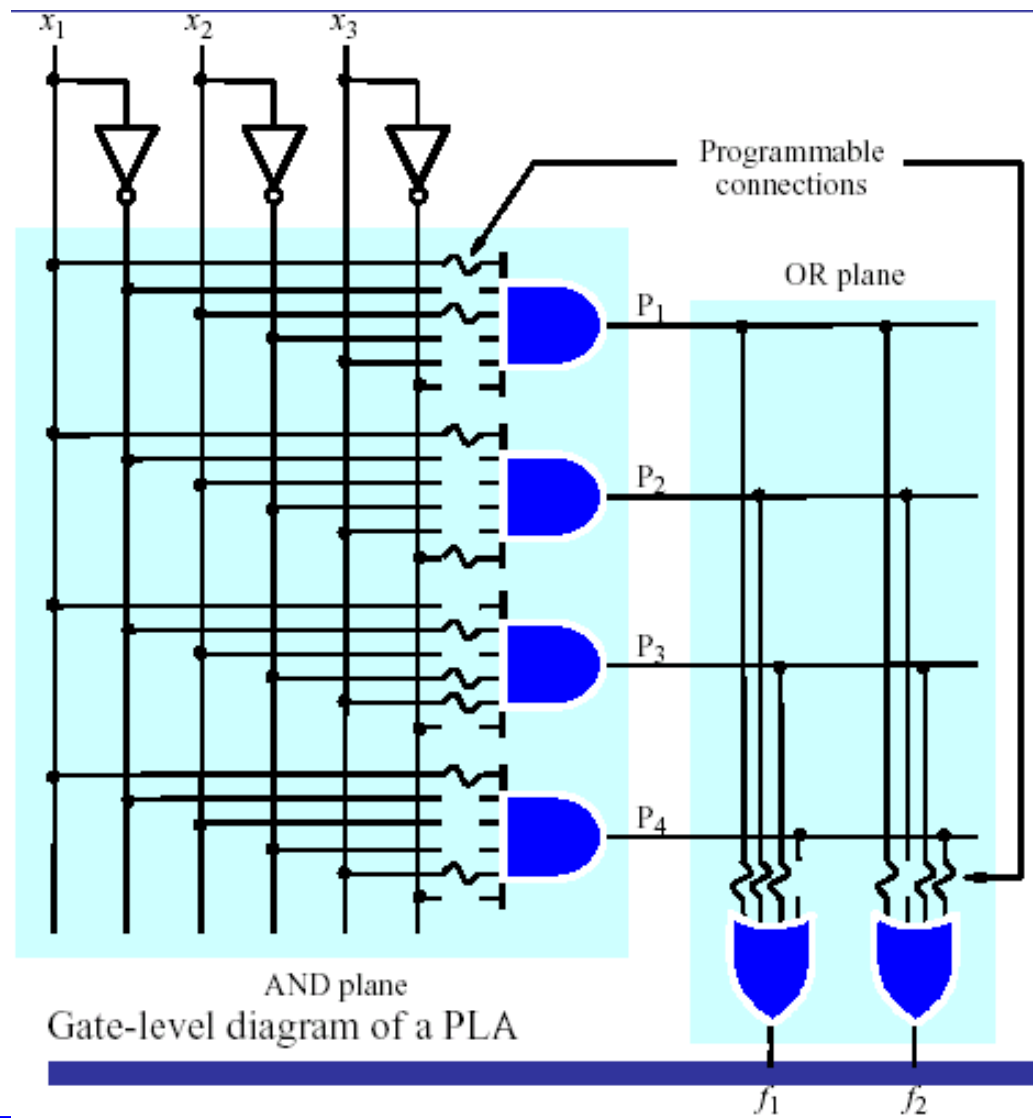

- Pre-fabricated building block of many AND/OR gates (or NOR, NAND)
- General purpose logic building blocks
- “Personalized” or “customized” by making/breaking connections among the gates
- This process is called “programming”

PLA

- Realizes Sums of Products

PLA

PLA

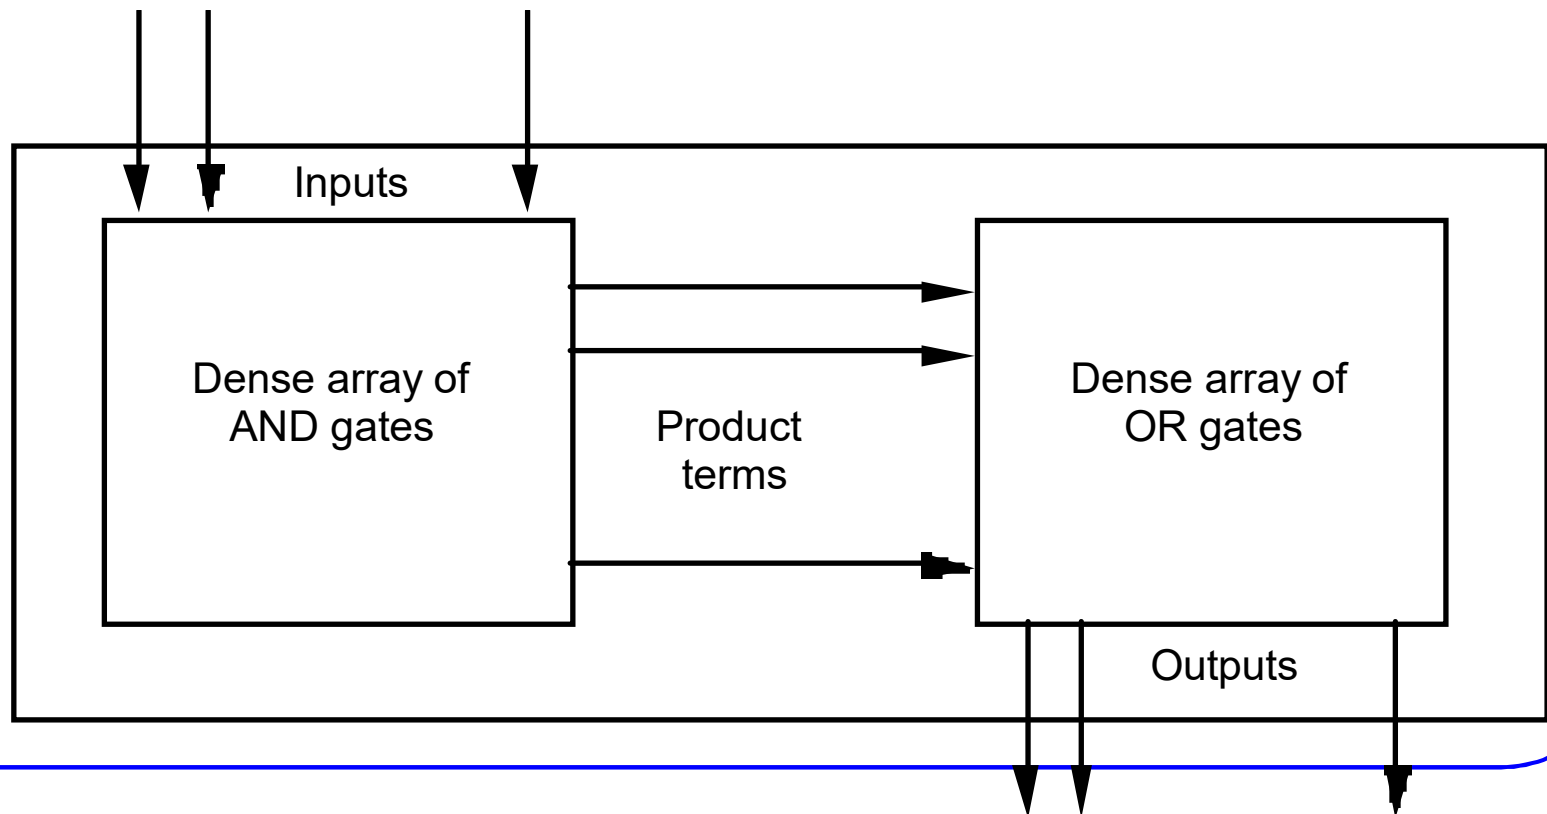

- A 3×2 PLA with 4 product terms.

PALs

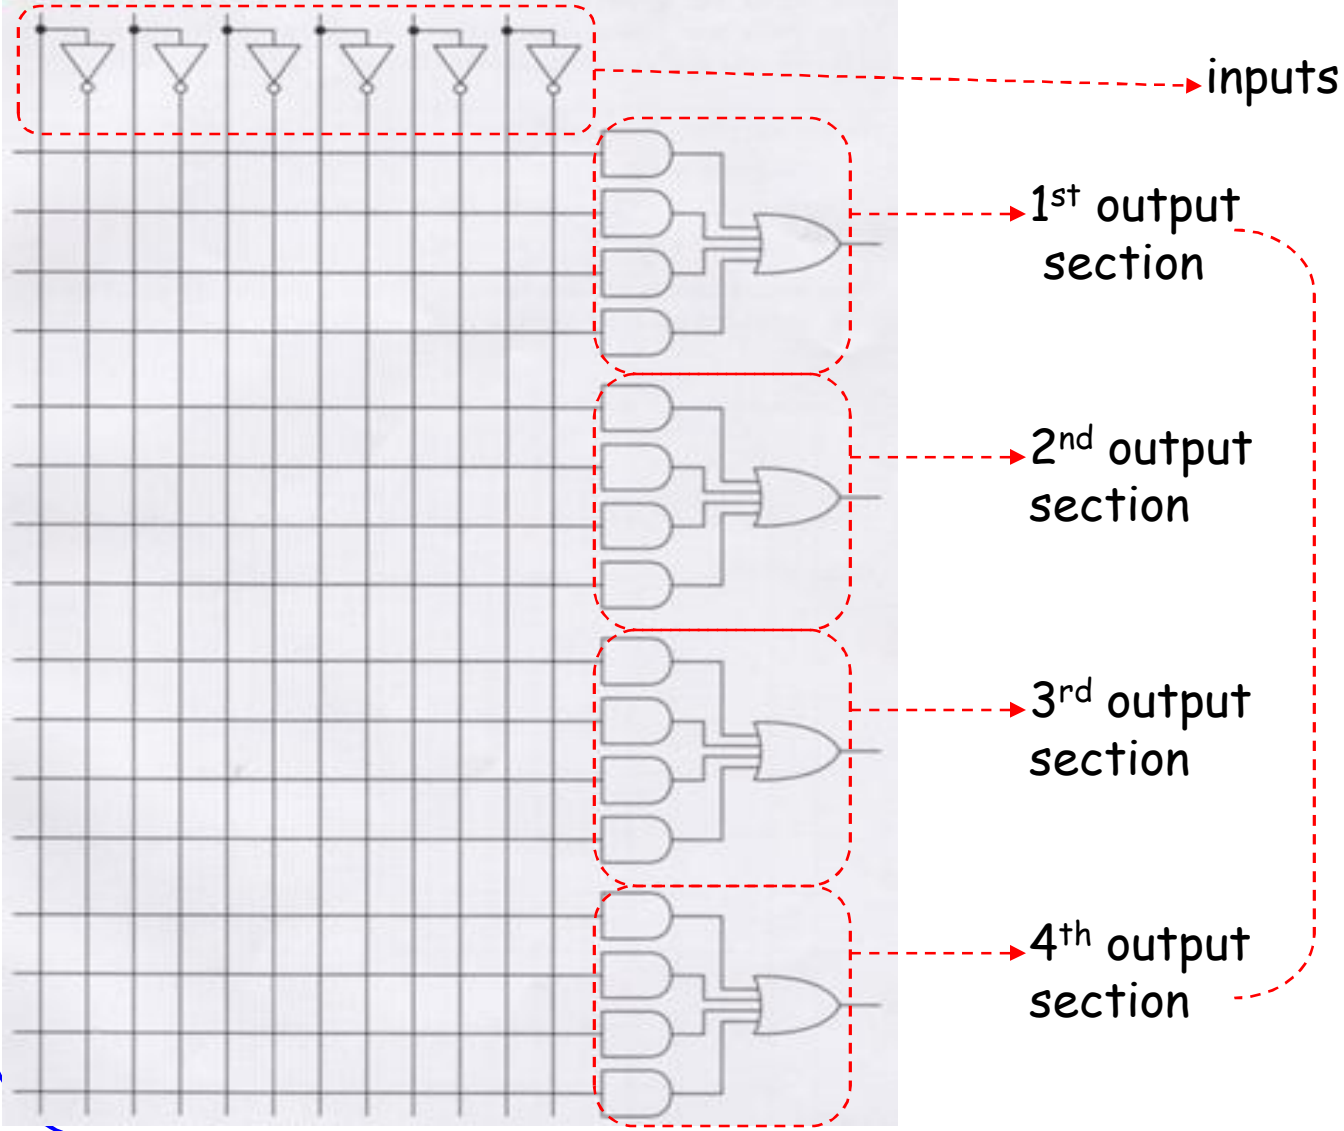

- **Programmable Array Logic**

- ◀ Realizes Sums of Products but with a *fixed* OR array

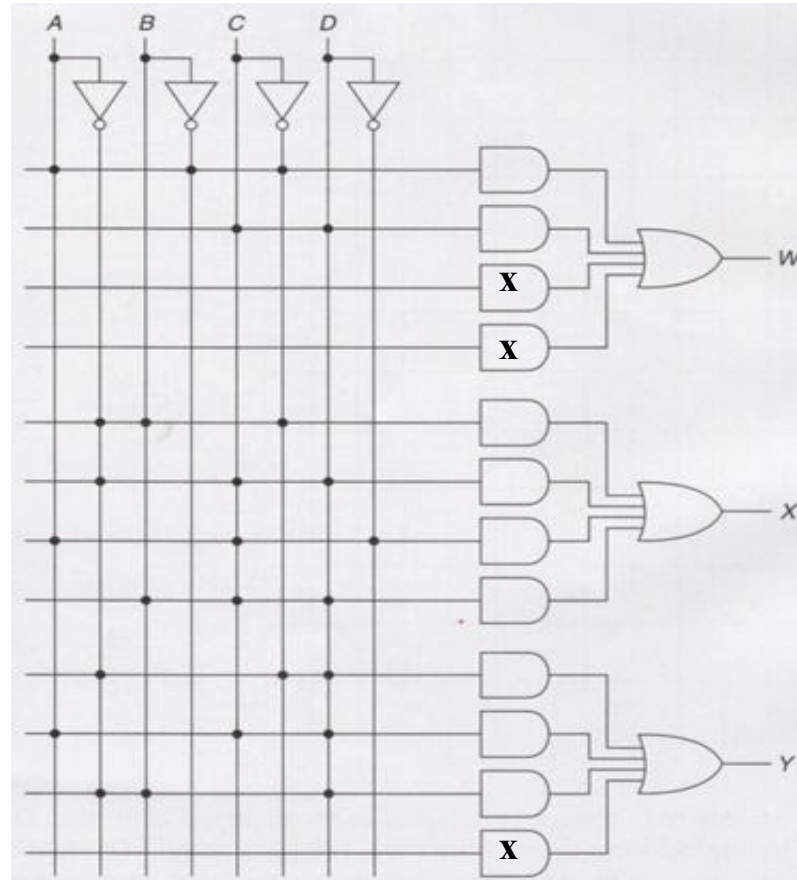

PAL

Figure 4.15 A PAL

Only functions with
at most four
products can be
implemented

PAL

$$W = AB'C' + CD$$

$$X = A'BC' + A'CD + ACD' + BCD$$

$$Y = A'C'D + ACD + A'BD$$
